

The Almac Pod™ — your product, safe in our hands

At Almac Clinical Services, we understand the need for tailored and innovative solutions to safeguard your global clinical trial with assurance and reliability. Our exclusive, superior shipper, the Almac Pod™, delivers a Protected, Optimised and Dynamic temperature controlled shipping solution. The Almac Pod offers enhanced protection for your clinical shipments and is supported by advanced technology – the perfect solution for Biologics or difficult to handle products.

Part of our global end-to-end temperature management and supply chain management solution, the Almac Pod is Almac's Protected, Optimised and Dynamic temperature controlled shipping solution, offering a superior service to meet environmental demands. Exclusive to Almac, this world-class solution is provided in partnership with our Almac-approved global courier network.

Almac Pod - Protected

- Qualified for up to 96 hours of protection.
- Available in the following 3 key temperature ranges:
 - +2°C to +8°C
 - +15°C to +25°C
 - -15°C to -25°C
- Partnership with global courier network creates visibility and control on temperature controlled shipments within the supply chain.

Almac Pod - Optimised

- The Almac Pod is designed for reuse, with no shippers left at clinical site.
- Optimised technology to eliminate temperature excursions
- No disposal required - once clinical material has been removed, courier will collect the empty Pod.

- Simple and transparent single use charge. Recovery, quality assurance and re-supply all included.
- Optimised – up to 96 hours of protection.

Almac Pod - Dynamic

- Utilises phase change material to offer enhanced thermal protection.
- Can be immediately placed into appropriate storage at each point of packing and in-transit.
- Improved operational processing capacity and flexibility.
- Enhanced solution gives Almac the ability to perform a year round pack out of clinical shipments.
